Movies Update Daily.Q: Create an array of addresses from an array of labels I have two NSMutableArray arrays of labels, both with the same number of values in them. I would like to create an array of addresses from each of these values so that I can display them in a map. I can not for the life of me figure out how to do this. I have looked at the Address Book API and the Object Mapping Guide, but neither of those seem to help. Thanks for any help. A: Assuming your
